

I am in favor of keeping the Indiana Telephone Privacy act as it is and not adopting a National Act that is less strict. I enjoy the evenings as family time and do not want to be bothered with telemarketers!!! Before our no-call list I had to turn my phone off in the evenings, now if my phone rings I know it is friends or family. I don't want to have to go back to call screening or worse, not taking any calls at all! Thanks for your considerations.
